

STANTECH MOTORS LIMITED

Environmental Policy Statement

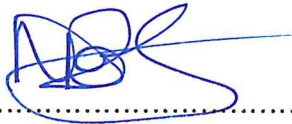

1. Copy of the Environmental Policy provided
2. Guiding principles for environmental stewardship and sustainability;
Principles for environmental stewardship and sustainability;
 - i) Creating awareness
 - ii) Partnership with other stakeholders
 - iii) Environmental conservation
 - iv) Restoration
 - v) Complying with all applicable environmental laws, permits and regulations
3. How the policy commits the company to a program of improvement in its environment;
The environmental policy has ensured that the company has implemented a program on various environmental activities including;
 - i) Modernizing its Workshop tools and equipments. For example the state of the art spray booths have been installed to prevent paint fumes from polluting the air. A centralized used oil collecting tank which prevents used oils from going down the drainages which pollute the environment. Air compressor to fasten tasks in the workshops etc
 - ii) The policy has ensured efficient Waste Management. The company has contracted a NEMA licensed waste management company which collects waste at scheduled periods.
 - iii) The company has engaged a cleaning company which ensures a clean working environment.
 - iv) Partnering with other stakeholders in tree planting activities

4. How the policy extends to the products and services supplied;

The policy has ensured appropriate communication of our environmental requirements to our supply chain. For instance we share our environmental policy with our customers at the tendering level. The same is also well communicated to our suppliers during the vetting process

5. How the policy complies with relevant environmental laws

The company complies to all the applicable environmental laws, permits and regulations. For instance environmental audits are done annually as per the statutory requirements, and any areas of improvements are noted and promptly acted upon

Rosemary Mwambura
